Requirements and Helpful Hints For Taking Apparatus Photos

Acceptable Format:

High resolution digital images or 35mm color prints. Check your camera's manual for directions on how to take high-resolution images. Desired Minimum size is 1024 pixels by 768 pixels. Larger is better. Do not send scratched or out of focus photos.

Unacceptable Format:

Polaroids, low-resolution digital images and ink jet prints.

Mail or E-mail Photos/Images:

Mail prints to address below. Digital photos may be e-mailed to: photos@firetec.com. Be sure to put your department name on the subject line.

Helpful Hints:

Positioning The Vehicle: Avoid clutter; it competes for the viewer's attention. If possible, select uncomplicated backgrounds (wires, poles, signs and other vehicles are distracting). You want to be close enough so that the vehicle is the main focus of the photo, but far enough away to capture all of what you are trying to show.

Choose A Sunny Day: It is best to take photos outside, on a sunny day. Be sure to keep the sun at the photographer's back (reposition the vehicle if necessary.) If this is not possible, use a flash. Take photos from multiple angles.

More Helpful Hints:

- The vehicle should be on a level surface.
- Do not alter the photos or digital images. Our staff will make any modifications that are necessary.
- For film, use the entire roll; for digital images, take at least a dozen pictures and remember to include shots of all the important features. *Provide photos that would be appealing to potential buyers.*
